About Us

The Youth Climate Council Global Alliance (YCCGA) is a network of youth advisory bodies around the world that work with public offices and youth climate movements to establish institutionalized mechanisms for youth participation in local climate policy-making. Our activities are centered around replicating institutionalized Youth Climate Councils, fostering engagements and collaboration within Youth Climate Councils, and executing cross-regional policy advocacy and engagement. The YCCGA, beyond its influence and impact on the international level, also seeks to facilitate cross-regional collaboration and policy advocacy initiatives, building a collective effort to address global climate challenges and promote youth-led solutions at the regional level. Introducing the role of regional coordinators significantly impacts the inclusivity of the YCCGA, as members of respective YCCs are able to interact with the YCCGA coordination team in their mother tongues.
